

Government Degree College Kukatpally

2. Describe the student centric methods, such as experiential learning, participative learning, and problem-solving methodologies etc., adopted for enhancing learning experiences?

We at Government degree college, Kukatpally impart education through student centric approach in order to improve the teaching and learning quality. This approach not only boosts up the confidence and individuality in the students but also changes the role of students from mere passive recipients to active and involved stakeholders, As different students have different abilities, uniform outcome cannot be expected hence teachers ensure student involvement in class activities so that they can absorb and grasp information at their own pace.

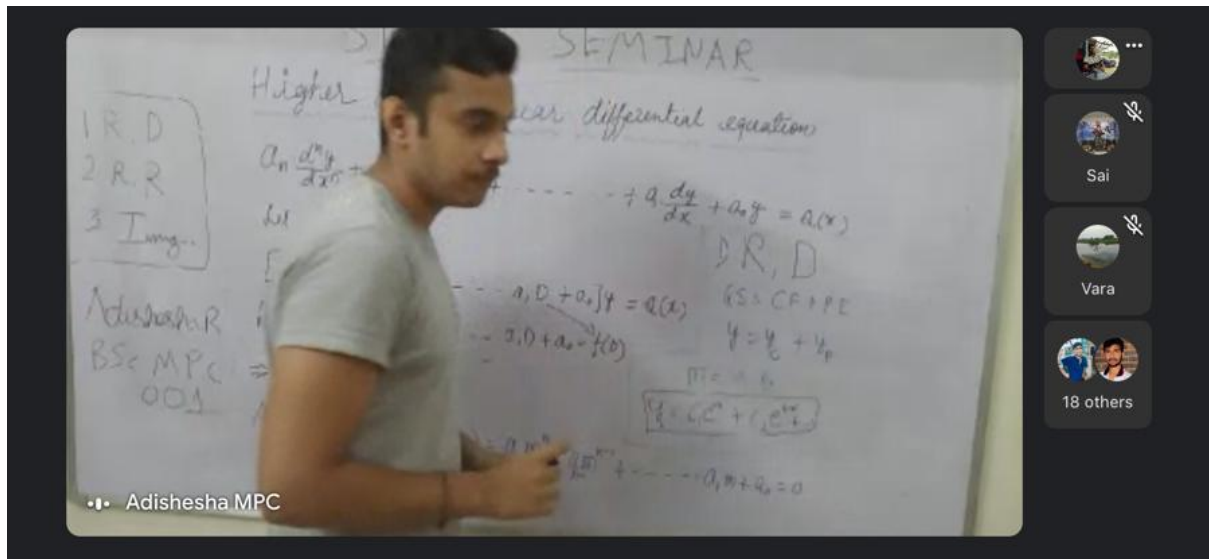

Teachers in our institution strive to make the classes as interactive as possible and encourage innovative thought and novel interpretations. The Departments provide experiential and participative learning by means of Audio- Visual methodology, TSKC Lab, Google Classroom, Field Visits, and Projects etc..

The planning of internal assessments is such that the students have to work independently and also they have to submit written assignments which are a part of internal assessment by collecting data on a given topic. This helps in honing their writing skills and inculcates an interest in research activities. Seminar presentations conducted by all departments help students overcome fear, improve their presentation skills and develop oratory powers.

The lab work and projects undertaken by different labs help students acquire experiential learning and problem solving ability.

Ability Enhancement, Generic and Skill Enhancement courses are offered to provide and prepare students for life. NSS Cell has been set-up for the students to participate, integrate and learn.

Student representation in administration is an important initiative taken by the College. Representatives of students serve as members in college committees in order to involve them in the decision making process and maintain transparency apart from inculcating a sense of responsibility in them.
