Impact of Covid 19 on Street Food Vendors- A Study on Street Food Sellers of Kukatpally

by

G.Amaravathi, Asst.Prof. of Commerce

ABSTRACT

The global **Covid-19** pandemic posed unprecedented economic challenges to everyone across the world. The pandemic has disproportionately impacted the world's poor population in terms of livelihood and survival. The street vendors were among the hardest hit, suffering in the most unexpected ways as their livelihood was shattered. This study explores how street vendors survived the pandemic, as well as what obstacles and problems they faced.

The study aimed to understand the effectiveness of the new scheme “Pradhan Mantri Street Vendor’s Atmanirbhar NidhiYojana” introduced by the central government; to analyze the issues faced by the street vendors during and after the lockdown (post lockdown) and the schemes and laws passed for the street vendors, that have helped them in any form during this period of uncertainty. A mixed research approach was used in the present study i.e., both quantitative and qualitative approaches were used.

The Primary data was collected with 51 street vendors through personal interviews with the help of a questionnaire and personal interviews with 5 bank managers of the public sector whose banks are part of the government loan scheme to the street vendors.

The exploratory study concluded that most street vendors are uneducated with low income, with lack of awareness of government-sponsored schemes, and highly dissatisfied with the business even after removal of lockdown. The study highlighted the need for promotion and creating awareness of all government schemes.

Keywords: pandemic covid-19, street vendors, bank managers, awareness of governmental scheme, pm svanidhi,
