1. Introduction

The Department of Commerce of Government Degree College, Kukatpally has fostered a best practice titled “Three Laurels” to offer three certificate courses on Financial institutions, Banking and Entrepreneurial Development to the benefit of B. Com students, in the pursuit of which, a certificate course titled “Introduction to Financial Institutions and Markets” is designed to provide hands on exposure to Commerce students on the capital and money markets of India, so that, the tenets learnt in this course may augment their employability skills and helps finding livelihood sources irrespective of their progression into post graduation or any other professional course. This course connects the students to various financial instruments traded in primary and secondary markets such as the shares, mutual funds, debentures and derivatives, and also enhances the cognitive levels of the participants to actively trade in the stock exchanges which is an indispensable skill required for the Commerce students to prove their competencies in the career.

2. Need for the Course

B. Com (Computer Applications) offered by the affiliating university of this college does not contain any paper in its curricula that provides basic knowledge to Commerce students on Financial Markets, nevertheless the terms like shares and debentures are widely used in the syllabus of accounting papers taught in second and third semesters of the programme. Therefore, there is a dire need to cement this gap through certificate courses to connect the students to financial markets and institutions which are quintessential for any Commerce graduate to reap employment opportunities in the market. Thus, this course is an obvious value addition created by the Department of Commerce to its students.

3. Objectives of the Course

- Imparting basic knowledge to the participants on Financial institutions and markets.
- Exposing the students to various online trading platforms.
- Generating alacrity on the domains like portfolio management, Financial Analytics and market forecasting.

4. Structure & Duration of the Course

This course is structured into five modules to be taught in thirty hours, such that each module shall be covered in six teaching hours. The targeted beneficiaries of the course are the 5th semester students of B. Com (Computer Applications). Therefore, it is proposed to be implemented in the month of November of every academic year.

5. Evaluation and Certification

The performance of the students shall be evaluated through assignments and main examination. The course shall carry fifty marks of which maximum ten marks shall be awarded for submitting the assignment work and remaining forty marks shall be awarded through final examination. The course consists of twenty assignment questions of which, students are instructed to answer any ten questions. The participants should secure minimum of fifty percent marks together in assignments and main exam to obtain certificates. This programme does not provide any grading.
